DETAILED ACTION

DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3 and 5-9, drawn to a polyolefin macromonomer having a terminal vinyl group represented by the formula $-\text{CH}-(\text{R}_2)=\text{CH}_2$, wherein R_2 is a hydrogen atom or a methyl group, classified in class 525, subclass 69.
 - II. Claim 4 is, drawn to a polyolefin macromonomer having a terminal vinyl group represented by the formula $-\text{Ar}-\text{CH}=\text{CH}_2$, wherein Ar is a single aromatic ring having a functional group selected from a halogen atom, a hydroxyl group, a carboxyl group, an acid halide group, an epoxy group, an amino group and an isocyanate group, classified in class 525, subclass 191.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and/or different effect because the terminal vinyl group in Group I is an aliphatic hydrocarbon segment, whereas a terminal vinyl group in Group II is a reactive styrene derivative.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

1. A telephone call was made to Raymond Stewart and Marc Weiner on October 27, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner notices that the original claim 5 could be rejected under 112(2nd paragraph) because the independent claim 5 has no definition for a formula (I).
